

1874.

NEW SOUTH WALES.

VITAL STATISTICS.

EIGHTEENTH ANNUAL REPORT

FROM

THE REGISTRAR GENERAL, ON VITAL STATISTICS.

Presented to both Houses of Parliament, by Command.

SYDNEY:
THOMAS RICHARDS, GOVERNMENT PRINTER, PHILLIP-STREET.

1874.

1874.

VITAL STATISTICS.

THE REGISTRAR GENERAL TO THE HONORABLE THE COLONIAL SECRETARY,

TRANSMITTING ABSTRACTS OF

MARRIAGES, BIRTHS, AND DEATHS,

FOR THE YEAR 1873, WITH PREFATORY REPORT.

Registrar General's Department,
Sydney, 13 July, 1874.

SIR,

I have the honor to forward to you the Tables compiled from the Returns of Marriages, Births, and Deaths, recorded in the Metropolitan and Country Districts of the Colony during the year 1873.

From these returns it will be found that the increase of additional names to the registers has been 37,823, which, with those previously recorded, brings up the total number to 537,647. Marriages contributed 8,768; Births, 21,444; and Deaths, 7,611. As compared with the previous year, there were 459 more Marriages celebrated, and the registered Births and Deaths were in excess 1,194 and 143 respectively.

The estimated population of the Colony at the close of the year was 560,275 persons, of whom 307,329 were males and 252,946 females, the excess of the former over the latter being 54,383, that is to say, to every 1,000 of the population there were 548 males and 452 females, the proportion being the same as in the previous year. The increase in the population over 1872 was 21,085 souls, or 3·91 per cent., which is about the same as the increase recorded in my last report. The number of persons who arrived in and left the Colony seaward during the year was 24,022 and 16,770 respectively, which figures represent nearly the same numbers as in the year 1872.

During the year there were 4,384 Marriages celebrated, and 21,444 Births and 7,611 Deaths registered. The per-centage which Marriages bore to the estimated population at the middle of the year was 0·79—Births, 3·90, and Deaths, 1·38.

As compared with the previous year this shows a slight increase in Marriages and Births and a decrease in Deaths.

Of the total number of registrations for the year, Marriages represent 13·11, Births 64·13, and Deaths 22·76.

(A.)

30th September.....	1,053	2,840	2,898	5,738	1,122	704	1,826
31st December	1,075	2,887	2,644	5,531	1,168	752	1,920
TOTAL.....	4,384	10,952	10,492	21,444	4,599	3,012	7,611

From the foregoing table we find that the Marriages celebrated in 1873 exceed in number those of the preceding year by 459.

Out of the total number of Marriages in the Colony, 28·70 were celebrated in Sydney, 7·20 in the Suburbs, and 64·10 in the Country. .

As compared with the previous year the City shows 1·82 increase, and there is a decrease of ·09 and 1·73 in Suburbs and Country Districts respectively.

Taking population into account, the rate per 1,000 was 7·98, which is slightly higher than the previous year, and 0·15 above the average of the preceding five years.

The above table is a Decennial Return of Marriages celebrated by the various denominations and the Registrars of the Colony, which is followed by a Return showing the per centage of Marriages by each denomination for the years 1872 and 1873, and also giving the increase and decrease between the two years.

During the year 1873 there were two marriages celebrated in Sydney by the Registrar General, six by Suburban Registrars, and 171 by Country Registrars.

Protestant Episcopal.....	2	4
Registrars	179	272	86	24'02
TOTALS.....	4,384	7,516	1,252	14'26

Of the total number of persons married in 1873, there were 14'26 per cent. who affixed their marks to the Registers, which is a small increase on the per centage of the year 1872. The marriage certificates received from Registrars show that nearly one-quarter of the persons named therein were not able to write.

The following tabular statement refers to the same subject, and gives the number and per centage of signatures and marks of males and females in Sydney, Suburbs, and Country Districts.

	No. of Marriages.	Full Signatures.			Marks.			Marks per cent.
		Males.	Females.	Total.	Males.	Females.	Total.

	1872	527,682	1,057	975	942	951	3,925	7.44
	1873	549,217	1,135	1,121	1,053	1,075	4,384	7.98
			9,826	9,326	9,335	9,104	37,591	

BIRTHS.

The number of Births registered in the Colony was 21,444, of which 10,952 were males and 10,492 females, or 51.07 and 48.93 per cent., respectively, to total Births.

The increase over the year 1872 was 1,194, comprising 676 males and 518 females. The excess of males over females was 460, or 2.14 per cent.

The

The proportion of male and female Births to total number of Births registered in the City, Suburbs, and Country, is as follows:—

	Males.	Females.	Total.	Males Per cent.	Females Per cent.
Sydney.....	1,556	1,509	3,065	7·26	7·04
Suburbs	1,453	1,310	2,763	6·77	6·11
Country	7,943	7,673	15,616	37·04	35·78
	<u>10,952</u>	<u>10,492</u>	<u>21,444</u>	<u>51·07</u>	<u>48·93</u>

The greatest disparity between male and female Births occurs in the Country, where the former are 1·26 per cent. in excess of the latter.

In the abovenamed divisions the proportion of male to female Births is as follows:—

	Males.	Females.
Sydney	50·77	49·23
Suburbs	52·59	47·41
Country	50·86	49·14

Taking population into account we find that the ratio of Births to every 1,000 for the past six years was:—

1868.	1869.	1870.	1871.	1872.	1873.
40·50	40·46	39·80	39·57	38·37	39·04

Though the proportion of Births to population was a shade higher than in 1872, yet it did not reach the figures of the previous four years, or, indeed, of any one year since 1864, as will be seen on reference to the Decennial Table of Births which is now given.

(D.)

From

From this return it will be seen that the ratio of Births to every 1,000 of population is 36.92 in Sydney, 42.03 in the Suburbs, and 38.99 in the Country. Thus the Suburbs are in excess of Sydney by 5.11; the Country is also in excess by 2.07, and the difference between Suburbs and Country is 3.04 in favour of the former. The September quarter shows itself most prolific in Births.

(E.)

	834	827	1,661	318	313	631	2,466	2,418	4,884	3,618	3,558	7,176

The number of illegitimate Births registered during the year was 889, which amounts to 4.14 per cent. of total number of Births. The proportion to every 1,000 of population is 1.62, being an increase of .10 on the year 1872.

The proportion which these Births bear to the total number of Births registered in Sydney is 6.49 per cent.; in the Suburbs 3.11 per cent.; and in the Country Districts 3.86 per cent.

The return which follows gives the number of cases of triplets and twins which have occurred for the last ten years.

(F.)

TABLE showing the number of TRIPLETS and TWINS born in the Colony of New South Wales, from 1st January, 1864, to 31st December, 1873.

Year.	Triplets.				Twins.			
	No. of Cases.	Males.	Females.	Total.	No. of Cases.	Males.	Females.	Total.

DEATHS.

The Deaths registered during the year 1873 numbered 7,611; of which there were 4,599 males and 3,012 females,—the excess of the former over the latter being 1,587. Allowing for the excess of male over female Births, we still find that there is a surplus on the year of 1,127 in favour of the females. The percentage of male to total Deaths, is 60.43; and of female, 39.57.

There were 143 more Deaths than in the previous year. The increase on the year 1872 in male Deaths is 157, while there was a decrease of 14 female Deaths.

The percentage of Deaths to population is 1.38, which is lower by 0.3 than the previous year.

The rate per 1,000 of Deaths to population for the last six years is as follows:—

1868.	1869.	1870.	1871.	1872.	1873.
15.83	14.06	13.28	12.58	14.15	13.85

The proportion for 1873 is therefore 30 lower than the previous year, and the mean of the preceding quinquennial period is 13.98.

The records of the year show that the following are the numbers of Deaths in each of the localities stated:—

	Males.	Females.	Total.	Per centage to total Deaths.
Sydney	1,010	790	1,800	23·65
Suburbs	538	459	997	13·10
Country	3,051	1,763	4,814	63·25
Totals	4,599	3,012	7,611	100·00

In comparison with the year 1872 there was a decrease of 10 Deaths in Sydney, and an increase of 82 and 71 in Suburbs and Country Districts respectively. According to population the Death rate per 1,000 in Sydney is 21·68, in Suburbs 15·16, and in Country 12·02; which figures, in comparison with 1872, show 1·01 less for Sydney, ·68 more for Suburbs, and ·30 less for the Country.

The Death rate of the City is 6·52 higher than the Suburbs, and 9·66 higher than the Country. The proportion in favour of the Country over the Suburbs is 3·14.

(G.)

TABLE showing the number of DEATHS registered in the Colony of New South Wales, during each Quarter of the Years 1864 to 1873.

	Estimated Population at the middle of each Year.	31 Mar.	30 June.	30 Sept.	31 Dec.	Total.	Ratio per 1,000 living.

	1872	527,682	2,139	1,716	1,740	1,873	14·15
	1873	549,217	2,007	1,858	1,826	1,920	13·85
		18,817	18,299	16,284	17,593	70,993	

The infantile mortality for 1873, which has usually formed so high a per centage to total Deaths, will be found to be lower than the previous year, or, indeed, than any of the preceding nine years. The proportion of Deaths under 5 years to total Deaths is 38·42, which is lower by 4·49 than the year 1872, and 6·10 than the mean of the past nine years. The per centage of these Deaths in the City is 39·94, in the Suburbs 51·15, and in the Country 35·62. Comparing these figures with 1872, we find that Sydney is lower by 5·08, the Suburbs by 3·82, and the Country by 4·12.

The mean per centage for the last ten years is 44·07 for the Colony, 46·85 for Sydney, 56·42 for the Suburbs, and 40·45 for the Country.

From

From the above decennial per centage Table it will be seen that in class I (Zymotic) the diseases termed Miasmatic, viz., Scarlatina, Measles, Diphtheria, &c., contribute the largest share. It is to be observed that the per centage of these complaints, which in 1867 stood at at 33.19, has been yearly on the decrease till it came as low as 16.58 in 1871; the following year it rose to 19.09, and in the year under consideration it was as low as 15.52.

Under the 2nd class (Constitutional) Diathetic and Tubercular diseases contribute 4.27 and 8.78 respectively.

In the 3rd class (Local) nervous diseases, such as Apoplexy, &c., rank the first at 15.50, and next comes the order termed Respiratory, including Bronchitis, Pneumonia, Asthma, &c., at 10.87. There seems to have been little fluctuation here for three or four years.

The 4th class (Developmental) gives a total of 18.54, without much change for the last six years.

The last and 5th class includes all deaths arising from Violence, Negligence, Accident, &c., and forms 8.57 per cent. of the whole.

The last table which will be given is that wherein it is stated the total number of Deaths registered in Sydney in each month of the year 1873, accompanied by a meteorological abstract. Grouping the year into four periods we find that in the months of June, July, and August, the mean temperature being 54, the number of deaths is 388; the next quarter, ending in November, there were 387 deaths, and the mean temperature was 63; in December, January, and February, the temperature being about 70, the deaths numbered 448; and in the quarter ended 31st May the deaths amounted to 441, with a temperature about the same as the previous three months.

(L.)

Period.	No. of Deaths.	Mean Temperature.	Mean Height of Barometer.	Rain.		Mean amount of Ozone.
				Depth.	Days.	
January	148	71.1	29.917	4.14	13	4.3
February	128	70.6	.083	6.74	14	4.2
March	143	68.6	30.086	6.81	15	4.6
April	147	64.8	.116	5.83	13	4.9
May	151	58.7	.139	5.31	15	4.5
June	130	55.2	.115	6.45	11	5.0
July	131	52.6	.009	3.94	10	5.1
August	127	54.6	.100	2.04	9	4.8
September	115	59.0	.051	1.48	9	5.2
October	130	63.5	29.987	2.66	12	5.4
November	142	66.2	.968	3.92	12	5.2
December	172	70.0	.904	2.68	11	4.6
Mean of Twelve Months.....	138	62.9	29.956	4.33	12	4.8

As a conclusion to this report I have to call attention to the necessity for an amendment in our marriage law, which is at present deficient in several important particulars. I admit that in proposing any alteration of the law it would be difficult to give satisfaction to some of the religious denominations who make no distinction between the religious ceremony and the civil contract. From my experience I should advise that the civil contract be made the legal proof of marriage, leaving the religious ceremony to the option of those interested.

By this means the Registrar General would be enabled to obtain more reliable records, and the fact of persons being compelled to appear before a civil functionary would, in my opinion, have the effect of checking, to a great extent, false declarations, and of lessening the cases of bigamy.

I have the honor to be,
Sir,
Your obedient servant,
E. G. WARD,
Registrar General.
